PROFILE

Full Stack Developer with solid experience in scalable projects, process automation, and data analysis applied to high-complexity business environments. I work with Python (Django, Pandas, NumPy) on the backend, JavaScript/TypeScript with React.js/Next.js on the frontend, and R for data visualization and statistical modeling. Throughout my career, I have worked on portfolios generating over R\$ 1 million/month in revenue, developed analytical reports using Python and R that contributed to reducing average issue resolution time, and, based on customer data analysis, helped the team achieve record-breaking performance results in the Mapfre, Volkswagen, and Honda portfolios. Experienced with RESTful APIs, WebSockets, MongoDB, PostgreSQL, and Azure infrastructure with CI/CD, always focused on quality, scalability, and direct business impact.

TECHNICAL SKILLS

Data Analysis & BI | Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), R (ggplot2, dplyr, tidyr), Jupyter Notebook, Power BI.

Frontend | React.js, Next.js, JavaScript, TypeScript, TailwindCSS, CSS3, HTML5.

Backend | Python, Django, Django REST Framework, RESTful APIs, WebSockets, Modular Architecture.

Databases | MongoDB, PostgreSQL, Mongoose, SQLAlchemy.

Cloud & DevOps | Microsoft Azure, CI/CD, Git, GitHub, Nginx, Observability.

EXPERIENCE

Full Stack Developer III | Dec 2025 – Present

PASCHOALOTTO — Remote

- Develop Full Stack solutions with Python (Django) and React.js/Next.js focused on process automation and system integration. Contribute to the evolution of a strategic platform that internalized previously outsourced services, generating an estimated financial impact of R\$ 2 million annually for the company.
- Led backend modularization using layered architecture and implemented Sprint structures within the team, ensuring predictability and scalability in deliveries.
- Developed a BFF in Next.js with Route Handlers, JWT in HttpOnly cookies, rate-limiting, and cache with automatic revalidation, reducing endpoint exposure and improving frontend perceived latency.
- Lead observability initiatives in Azure: VM monitoring, request metrics analysis, and performance bottleneck identification for proactive production adjustments.

Python, Django, React.js, Next.js, TypeScript, MongoDB, PostgreSQL, Azure, Nginx, GitHub.

Backend Developer | Aug 2025 – Dec 2025

PASCHOALOTTO — Remote

- Worked on backend development with Python/Django and frontend development with Next.js/React, delivering robust and scalable applications using MongoDB and PostgreSQL.
- Responsible for standardizing best coding practices with Django and Next.js across team projects, promoting component reuse and architectural consistency.
- Developed automations for repetitive tasks: report generation, external API integrations, data synchronization, and monitoring of critical processes.
- Participated in internal presentations about Artificial Intelligence solutions applied to daily operational activities.

Python, Django, React.js, Next.js, TypeScript, MongoDB, PostgreSQL, Azure, Git.

Digital Solutions Analyst | Apr 2025 – Aug 2025

PASCHOALOTTO — Remote

- Developed exploratory analyses and reports using Python (Pandas, NumPy, Matplotlib, Seaborn) and R (ggplot2, dplyr) for operational metrics visualization, supporting strategic leadership decisions.
- Participated in the creation of an institutional game in Python whose engine simulated real customer service scenarios, guiding operators on how to act with each customer profile, directly contributing to improved team performance indicators.
- Started my immersion into backend development with Python and Django, consolidating architecture and code organization best practices.

Python, Django, Pandas, NumPy, Matplotlib, Seaborn, R (ggplot2, dplyr), Jupyter Notebook, Azure, Git.

Digital Solutions Assistant | Aug 2024 – Apr 2025

PASCHOALOTTO — On-site

- Worked on data analysis for portfolios generating over R\$ 1 million/month, monitoring operational KPIs and identifying improvement opportunities.
- Developed reports and dashboards using Python and R for metrics visualization, contributing to reducing average issue resolution time across portfolios.
- Based on the analyses performed, helped the team achieve record-breaking performance results in the Mapfre, Volkswagen, and Honda portfolios.
- Collaborated on system integrations, task automation using Python and Azure, and was responsible for technical and operational documentation within the team.

R, Python, Pandas, NumPy, Matplotlib, Seaborn, R (ggplot2, dplyr), Jupyter Notebook, Azure, Git.

EDUCATION

Bachelor's degree in computer science | 2024 – 2027

Unisagrado – Universidade Sagrado Coração, Bauru-SP

Systems Development Technician | 2023

ETEC – Bauru
